- Dual zone climate control system
- FM/Internet streaming radio
- Textile seating
- Center console with open storage and two USB ports

### Tesla Autopilot

Autopilot is an increasingly capable suite of safety and convenience features that make personal transportation safer and more enjoyable.

#### Safety is Standard

- **Automatic Emergency Braking**

Detects objects that the car may impact and applies the brakes accordingly

- **Side Collision Warning**

Warns the driver of potential collisions with obstacles alongside the car

- **Front Collision Warning**

Warns of impending collisions with slower moving or stationary cars

### Enhanced Autopilot

Model 3 will match speed to traffic conditions, keep within a lane, automatically change lanes, transition from one freeway to another, exit the freeway and self-park at your destination. This is a driver's assistance feature with the driver responsible for remaining in control of the car at all times.

Software has begun rolling out and features will continue to be introduced as validation is completed, subject to regulatory approval.

\$5,000

\$6,000 upgrade after delivery

### Full Self-Driving Capability

In the future, Model 3 will be capable of conducting trips with no action required by the person in the driver's seat.

This functionality is dependent upon extensive software validation and regulatory approval. It is not possible to know exactly when it will be available, as this is highly dependent on local regulatory approval, which may vary widely by jurisdiction.

\$3,000

Requires Enhanced Autopilot

## Payment

A \$2,500 payment is required to place your order. Your total deposit will be non-refundable.
